

Perdix perdix

GREY PARTRIDGE

SPEC 3 (1994: 3) **Status** Vulnerable

Criteria See IUCN below

European IUCN Red List Category VU

Criteria A2b

Global IUCN Red List Category —

Criteria —

Perdix perdix is a widespread resident across much of Europe, which accounts for less than half of its global range. Its European breeding population is very large (>1,600,000 pairs), but underwent a large decline between 1970–1990. Although the species was stable or increased in many eastern European countries during 1990–2000, it continued to decline throughout most of western and central Europe—including sizeable populations in France and Poland—and underwent a large decline (>30%) overall. Consequently, it is evaluated as Vulnerable.

Country	Breeding pop. size (pairs)	Year(s)	Trend	Mag.%	References
Albania	100 – 300	95-02	(-)	(20-29)
